

A person is silhouetted against a dark, starry night sky. They are holding a flashlight that illuminates a small area of the sky. A large, bright beam of light, resembling a searchlight or a powerful flashlight, shines down from the top of the frame, creating a large, bright triangular shape. In the upper right corner, a large, detailed image of the moon is visible. The overall scene is dark and atmospheric, with a focus on the night sky and the person's interaction with it.
